RESPITES

URBAN

Thanks to a partnership with the Yvon Lamarre Foundation and the Centre de réadaptation en déficience intellectuelle et en troubles envahissants du développement (CRDITED) de Montréal, Emergo offered this new form of respite in an urban environment last year. These respites are specifically intended for families in a situation of exhaustion and sent by CRDITED. These respites are specifically intended for families in a situation of exhaustion and sent by CRDITED.

This year, we expanded this service and provided 14 weekends. A great success!

2017 SUMMER

For our second year at Lac Bleu, participants in the *Émergence* and *iDÉFIx* programs spent magnificent stays enjoying water activities, games, arts and crafts and, of course, camp songs.

The *Adaptatou* integration program gave our pre-teens and teens the opportunity to share unforgettable moments with dozens of other young people from all over Quebec in festive and colourful surroundings.

The Villa de l'Île-Perrot welcomed *Rêve à réaliser* this year. A superb site with a view overlooking the river and specifically adapted to the young adults and adults in the program.

2017-2018 SCHOOL

This was the third year of our school respites at Domaine du Lac Bleu, in Saint-Hippolyte, in the Laurentians. Supervised by enthusiastic, qualified counsellors, the participants made the most of the site throughout the fall and winter. This year, we relocated the school respites for autonomous participants to Villa de l'Île-Perrot. A real success!
